For those who get there first

Philips HeartStart FRx Defibrillator
Product information

Updated for Guidelines 2005
Sudden cardiac anyone, anytime,

- The current U.S. survival rate for SCA is less than 5%.
- The likelihood of successful resuscitation decreases by about 10% with every minute that passes.
- An additional 40,000 lives could be saved each year in the U.S. alone with widespread access to defibrillators.
arrest can happen to anywhere.

Power to save a life

Sudden cardiac arrest (SCA) is one of the leading causes of death in the United States, striking more than 340,000 victims each year, and hundreds of thousands more worldwide. More people die from SCA than from breast cancer, prostate cancer, house fires, hand guns, traffic accidents and AIDS combined.

SCA can happen to anyone, anytime, anywhere and sometimes in extreme conditions. Rely on the Philips HeartStart FRx Defibrillator to be up to the task. In the hands of those who get there first, it provides the power to save a life.

Coming to the rescue
Often first on the scene of an emergency, police forces equipped with AEDs can cut defibrillator response time to SCA victims by three minutes.

Taking care of business
Thirteen percent of workplace fatalities reported in 1999 and 2000 were due to cardiac arrest.

Protecting kids, parents and teachers
An estimated 5,000-7,000 children in the U.S. succumb to sudden cardiac arrest annually, many related to sporting events.
The Philips HeartStart
FRx Defibrillator

For more than a century, Philips has pioneered technology that makes life better. Today, we’re taking this commitment one step further, creating products that not only enhance life, but also preserve it. The Philips FRx Defibrillator is the newest member of the HeartStart family of defibrillators designed with new technological advancements to help in treating the most common cause of SCA.

The Philips HeartStart FRx Defibrillator is designed to be easy to use, rugged and reliable for those who get there first. On the scene with law enforcement, on the field with student athletes or on the job with employees, the FRx Defibrillator is the solution for treating SCA from ventricular fibrillation in environments and conditions too demanding for many other defibrillators.

The HeartStart FRx Defibrillator carries innovation in its genes. Building on the successes of the other members of the HeartStart family of defibrillators, the FRx brings innovations to the treatment of SCA.
The HeartStart FRx Defibrillator brings innovations to the treatment of SCA

**Preconnected SMART Pads II**

Pads for all patients. Save valuable time in an emergency with preconnected pads for use on adults and children. SMART Pads II eliminate the expense of having to purchase different pads sets for different patient types. What’s more, SMART Pads II enable the FRx to keep pace with responders by adjusting to their actions.

**Infant/Child Key**

Simply insert the Infant/Child Key into the FRx to signal to the device that you’re treating an infant or a child. The defibrillator adjusts to provide special pads placement and CPR instructions. The pads icons also flash to show you the appropriate pads placement and the device reduces the shock energy to a level more appropriate for an infant or a child (less than 55 pounds or 8 years of age).

**Wireless Data Transfer**

The FRx provides a mobile, wireless solution for data management using the Palm® handheld platform. It features an infrared data port for easy transmission of information without cables or hardwire compatibility issues.

**CPR Coaching**

The HeartStart FRx offers the industry’s first and only CPR Coaching feature for use on adults and children. CPR Coaching reminds the responder of CPR basics through detailed voice instructions.

---

**Proven therapy**

At the core of all HeartStart Defibrillators is SMART Biphasic technology. The HeartStart FRx Defibrillator’s biphasic waveform delivers a highly effective defibrillation shock that is also gentle to the heart. No other external defibrillation therapy has been supported by more published clinical data.⁷

SMART Analysis, a proven Philips technology for heart rhythm assessment, ensures that the FRx Defibrillator only shocks when it should. SMART Analysis automatically assesses the victim’s heart rhythm and is designed not to deliver a shock unless the rhythm is determined to be shockable – even if the Shock button is pressed.

And with patented Quick Shock, the FRx is fastest in class at delivering a shock after CPR. Studies show that minimizing time to shock after CPR may improve survival. As American Heart Association Guidelines 2005 notes, “Reduction in the interval from compression to shock delivery by even a few seconds can increase the probability of shock success.”⁸

**Designed for real world use**

The Philips HeartStart FRx Defibrillator is exceptionally rugged. Designed to surpass rigorous testing requirements, the FRx withstands jetting water, loads up to 500 pounds and a one-meter drop onto concrete.
Built on a platform of proven ease-of-use
The HeartStart FRx Defibrillator was designed to be as easy to use as the HeartStart OnSite Defibrillator and shares many of its features, including CPR Coaching and intuitive icon-driven operation. Although small and lightweight – just 3.5 pounds – the FRx is equipped to direct you through the resuscitation of a SCA victim.

The HeartStart FRx guides you through every step with clear, calm voice commands and descriptive visual icons. The FRx even reminds you to call emergency medical services (EMS). Pressing the blue i-button activates HeartStart CPR Coaching for assistance with CPR. The flashing icons and the Quick Reference Guide can be used to lead you through the defibrillation steps – even in situations where hearing voice instructions is a challenge.

Once EMS arrives, hand-off is fast and easy because the FRx is compatible with advanced defibrillators like the HeartStart MRx. With HeartStart adapters, our pads can be plugged into devices from other manufacturers to ensure continuity of care.

Providing a complete, reliable solution

Reliability backed by Philips
The HeartStart FRx Defibrillator is powered by an easy to install, long-life (four-year) battery, so you know the device is charged and ready. The device’s automated daily, weekly and monthly self-tests check the pads readiness, and verify functionality and calibration of circuits and systems. With over 85 tests, the FRx is one of the most comprehensive self-testing devices on the market and is virtually maintenance-free. The blinking green “Ready” light on the defibrillator is your assurance that the device is ready for use.

Philips HeartStart Essentials — The key to a successful early defibrillation program
Philips helps implement a comprehensive program with most everything you and your Medical Director will need to help save a life from sudden cardiac arrest. We’ll get you started with pre-implementation consulting and site assessments. We can manage your everyday needs including medical direction from a licensed physician, web-based program management, data management software, and responder and instructor training. Philips offers ongoing support with a five-year warranty, optional extended warranty and continued customer support from supplies ordering to technical assistance.

Easy as 1-2-3 in an emergency

1. Press the green On/Off button, which activates voice instruction.
2. Place the pads on the patient as directed.
3. When instructed by the device, press the orange Shock button.

| Instructions   | Detailed voice prompts and visual icons guide responder through use of the defibrillator. |
| CPR Coaching   | Voice coaching for adult and infant/child CPR provides instructions and audio cues for the appropriate number, rate and depth of chest compressions, as well as for each breath. |
| Controls       | Green On/Off button, blue i-button, orange Shock button, optional Infant/Child key |
| Indicators     | Ready light, blue i-button, caution light, illuminated pads, icons, Shock button lights up when shock is advised. |

| Physical       | |
| Size           | 2.4 x 7.1 x 8.9 inches (6 x 18 x 22 cm) H x D x W |
| Weight         | With battery and pads case: 3.5 lbs. (1.5 kg) Without battery or pads case: 2.6 lbs. (1.2 kg) |

| Environmental  | |
| Sealing        | Waterjet proof IPX5 per IEC 60529 Dust protected IPX5 per IEC 60529 |
| Temperature    | Operating/Standby: 32° - 122° F (0° - 50° C) |
| Altitude       | 0 to 15,000 feet |
| Aircraft       | Device: RTCA/DO-160D; 1997 |
| Crush          | 500 pounds |
| Vibration      | Operating: meets MILSTD 810F Fig 514.5C-17, random; Standby: meets MILSTD 810F Fig 514.5C-18, swept sine. |
| EMI (Radiated/Immunity) | CISPR, II Group I Class B, IEC 61000-4-3, and IEC 61000-4-8 |

<thead>
<tr>
<th>Patient Analysis System</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Patient Analysis</td>
<td>Evaluates patient ECG to determine if a rhythm is shockable. Rhythms considered shockable are ventricular fibrillation (VF), and certain ventricular tachycardias (VT) associated with lack of circulation. For safety reasons, some VT rhythms associated with circulation will not be interpreted as shockable, and some very low-amplitude or low-frequency rhythms will not be interpreted as shockable VF.</td>
</tr>
<tr>
<td>Shock Advised</td>
<td>Able to deliver a shock as soon as the device indicates a shock is advised.</td>
</tr>
<tr>
<td>Quick Shock</td>
<td>Able to deliver a shock after the end of a CPR interval, typically in eight seconds.</td>
</tr>
<tr>
<td>Shock-to-Shock Cycle Time</td>
<td>Typically less than 20 seconds between shocks in a series.</td>
</tr>
<tr>
<td>Artifact Detection</td>
<td>Advanced signal processing allows accurate ECG analysis even in the presence of most pacemaker artifact and electrical noise sources. Other artifacts are detected and corrective voice prompts issued.</td>
</tr>

Philips—The trusted choice

- A Fortune Global 500 company, Philips is one of the world’s largest medical products companies with annual revenue of over $7 billion.
- With over 350,000 automated external defibrillators installed, Philips is the leader in public access defibrillation.
- Over 7 billion HeartStart Defibrillator service hours have been logged, with an additional 7 million added every day.
- Over 17% of Fortune 1000 companies, 8 out of 10 major airlines, and 43 professional sports teams rely on Philips HeartStart Defibrillators.
